FOREWORD

The Department of the Navy (DON) Records Management (RM) Program establishes policies and procedures for life-cycle management (creation, maintenance, use, and disposition) of DON records. This manual provides guidelines and procedures for the proper administration of a records management program.

This manual implements the policy set forth in Secretary of the Navy Instruction (SECNAVINST) 5210.8D, *Department of the Navy Records Management Program*, 31 December 2005 and is issued under the authority of SECNAVINST 5430.7N, *Assignment of Responsibilities and Authorities in the Office of the Secretary of the Navy*, 9 June 2005.

This manual replaces SECNAV Manual M-5210, *Department of the Navy, Navy Records Management Program, Records Management Manual*, December 2005. Revisions were made throughout and major changes were made to the disposition schedules for DON records contained in Part III. The disposition schedules are listed by Standard Subject Identification Code (SSIC). The schedules incorporate National Archives and Records Administration (NARA) records disposition policies and guidelines and have been approved by the Archivist of the United States, as required by Title 36 Code of Federal Regulations (CFR) Chapter XII. This manual is the single records disposition authority for all DON records.

This manual is effective immediately; it is mandatory and applicable to the offices of the Secretary of the Navy, Chief of Naval Operations (CNO), Commandant of the Marine Corps (CMC), and all Navy and Marine Corps activities, installations, and commands.

Reports. Report Control Symbol SECNAV 5212-1 is assigned to the report on accidental destructions of records required by paragraph 6, Part I, and is approved in accordance with DON reports control procedures.

The statutory definition of records. Title 44 United States Code (USC) Chapter 33, defines records as “all books, papers, maps, photographs, machine readable materials or other documentary materials, regardless of physical form or characteristics, made or received by an agency of the United States Government under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, procedures, operations, or other activities of the Government or because of the information value of data in them. Library and museum material made or acquired or preserved solely for reference or exhibition purposes, extra copies of documents preserved only for convenience of reference, and stock of publication and of processed documents are not included.”

This manual may be accessed through the Department of the Navy Issuances web site:

PART I

**AUTHORITY AND PROCEDURES FOR RECORDS
DISPOSITION PROGRAM**

1. The Director of Records Office (DNS-5), Office of the Chief of Naval Operations. Is designated as the Navy liaison with the National Archives and Records Administration regarding naval records disposition. DNS-5 is designated as the single approval authority for request for records dispositions to the National Archives.

2. Statutory and Regulatory Authority. The disposition of Government records is given legal status by the Records Disposal Act of 1943, as amended, the Federal Records Act of 1950, 36 Code of Federal Regulations (CFR) Chapter XII, and Navy Regulations.

a. The Federal Records Act of 1950. The Federal Records Act of 1950 provides that, as part of the responsibility for the establishment of a continuing agency-wide records program, the Secretary of the Navy should propose retention and disposal instructions for all major series of Navy records and, once approved by the Archivist of the United States, ensure the proper application of these mandatory instructions.

b. U.S. Navy Regulations 1990, Article 1127. No person, without proper authority, shall withdraw official records or correspondence from the files, or destroy them, or withhold them from those persons authorized to have access to them.

c. Mistreatment of Government Records. Provisions of law prescribing the mistreatment of Government records are most stringent. Title 18, United States Code delineates a wide range of impermissible conduct, illustrating the rigorous care required in the handling of such records.

3. Goals of Records Management Program

a. Within the legal framework provided by law and Navy Regulations, the DON's records management program has as its principal goals:

(1) creation of records that adequately document the organization, functions, policies, procedures, decisions and essential transactions of the DON;

(2) preservation of records having long-term permanent worth because of their continuing administrative, legal, scientific, or historical values;

(3) destruction of temporary records as they outlive their usefulness; and

(4) retirement and transfer of those records no longer required in the conduct of daily business to more economical storage.

(5) Conduct periodic review of stored records to

ensure timely destruction of eligible records.

b. Accomplishment of these goals will reduce maintenance costs and, at the same time, provide management with more efficient records to conduct its daily business. In meeting these goals, the immediate objectives are:

(1) to decrease the volume of records in high-cost office spaces by destroying non-record material and increasing the volume of short-term records transferred to authorized local storage space and the transfer of long-term and permanent records to Federal Records Centers (FRCs);

(2) to reduce the number and volume of long-term or permanent naval records, but also increase the significance of those to be preserved; and

(3) to ensure that all records are programmed for retention or periodic destruction and that every activity and office properly applies the retention standards specified in this instruction.

4. Information Security. The DON Information Security Program Regulation (SECNAVINST 5510.30(series) and SECNAV M-5510.36) provides for the destruction of classified matter. This and other regulations for safeguarding security information shall be followed at all times in applying the provisions of this instruction.

5. Provisions for Emergency Destruction of Records. DON records may be destroyed without regard to the above statutory and regulatory requirements under two emergency conditions. These are provided for in the 36 CFR 1228.92.

a. When a State of War Exists or is Threatened. When the United States is at war with another nation or hostile actions appears imminent, naval records held outside the territorial limits of the continental United States may be authorized for emergency destruction. This authorization may come from the Secretary of the Navy or the head of the command having custody of the records. However, prior to destruction, it must be determined that: retention of the records would be prejudicial to United States interests; or the records occupy space urgently needed for military purposes and are without sufficient value to warrant continued preservation. Within 6 months after the disposal of any records under this authorization, submit a written statement describing the records and showing when and where disposal occurred to the Office of the Chief of Naval Operations (CNO) (DNS-5). For Marine Corps records, submit written statement describing the records and showing when and where disposal occurred to the Commandant of the Marine Corps (CMC) (ARDB).

b. When Records Menace Property, Health, or Life. Records such as nitrocellulose base film or tape sometimes become a menace to property, health, or life. Under such

circumstances, 36 CFR 1228.92 provides for their emergency destruction regardless of their retention period.

If any naval record constitutes such a menace, a request shall be made for its emergency destruction to CNO (DNS-5) via the administrative chain of command. CNO (DNS-5) will determine whether or not immediate destruction is warranted and, when necessary, obtain the concurrence of the Archivist of the United States. If any Marine Corps records constitute such a menace, a request shall be made for its emergency destruction to CMC (ARDB) via the appropriate chain of command. CMC (ARDB) will determine whether immediate destruction is warranted and, when necessary, obtain the concurrence of the Archivist of the United States.

6. Accidental Destruction of Records. The accidental destruction of records will be reported to the CNO (DNS-5). Marine Corps records will be reported to CMC (ARDB). This report will include:

- a. A complete description of the records destroyed, including dates of records if known.
- b. Volume destroyed in cubic feet; if electronic site the number in electronic volume terms (i.e., KB, MB, GB)
- c. The office of origin.
- d. A statement of the circumstances surrounding the destruction.
- e. A statement of the safeguards and planned procedures to be instituted to prevent further instances of loss of documentation.

7. Provisions for Transferring Records to Other Custody. Naval/Marine Corps records may be moved and assigned to other custody within the Naval/Marine Corps establishment, to Federal Records Centers (FRCs), to the National Archives and Records Administration (NARA), or to other government agencies. When moving the records involves a change in custody, the move is referred to as a records transfer. Changes in location within the activity, usually by removal to local storage areas, are referred to as records retirement. The subparagraph immediately following prescribes policies and procedures for transfer involving changes in custody of records.

a. Transfer to Federal Records Centers. FRCs store records in cardboard cartons on steel shelving in, warehouse-type space. (See appendix A for proper transfer procedures.)

(1) Activities are authorized to transfer records to FRCs without departmental approval when:

- (a) Records are specifically designated in this instruction for periodic transfer; or
- (b) Records are designated in this instruction for permanent retention.

(2) Activities should not transfer records to FRCs when:

(a) The quantity of a particular record series is less than 1 cubic foot (retain small accumulations on board until the retention period expires or until quantity accumulated is sufficient to justify transfer); or

(b) Cost of transfer and storage at FRC outweighs cost of local storage or department network storage.

(3) Except when categories of Naval/Marine Corps records are designated specifically in parts III, IV and V of this manual for transfer to a single FRC for convenience of administration and reference, activities shall transfer eligible records to the appropriate FRC servicing the area. Records should be transferred earlier than scheduled only if prior approval is obtained from the FRC, local storage or network space is not available and reference requirements are such that transfer will not hinder the activity's operations.

b. Transfer to NARA. NARA accessions records that have sufficient research, legal, scientific, historical, or other values to warrant their permanent preservation by the Government. Records that the DON has appraised as having these values are listed in parts III, IV and V of this instruction as "permanent" records. Records transferred to NARA may be referenced or withdrawn per procedures outlined in paragraph 7.

c. Transfer to Other Government Agencies or to Non-Federal Institutions. When the public interest will be served, records authorized for disposal may be offered to an eligible person, organization, institution, corporation, or government (including a foreign government) that has made application for them. Records will not be transferred without prior written approval of NARA. Request such approval via CNO (DNS-5), or CMC (ARDB) for Marine Corps records, and include the following:

- (1) Name of the command having custody of the records;
- (2) Name and address of the proposed recipient of the records;
- (3) A list containing:
 - (a) Records series description, including Standard Subject Identification Codes (SSICs);
 - (b) Inclusive dates of each series;
 - (c) The authorized disposal citation (i.e., SECNAV Manual 5210.1, SSIC 6010.1d); and
 - (d) Accession number

(4) A statement providing evidence:

- (a) That the proposed transfer is in the best interests of the Government;
- (b) That the proposed recipient agrees not to sell the records; and
- (c) That the transfer will be made without cost to the U.S. Government.

(5) A certification that:

- (a) The records contain no information the disclosure of which is prohibited by law or contrary to the public interest; and/or
- (b) The records proposed for transfer to a person or commercial business are directly pertinent to the custody or operations of properties acquired from the Government; and/or
- (c) The foreign government desiring the records has official interest in them.

d. Transfers within the Department of Defense (DOD). Transfers of records within DOD usually involve the transfer of functions. In such instances, the transfer of records is needed to assure the continuity of functions. Negotiate such transfers between the activities and offices concerned. Prior approval is not required, but a copy of the agreement or report accomplishing the transfer shall be submitted to CNO (DNS-5) or the CMC (ARDB) for Marine Corps activities.

e. Transfers within the Department of the Navy (DON). Transfers within DON are negotiated between the organizational components concerned. Approval for such transfers is not required but notify CNO (DNS-5), or the CMC (ARDB) for Marine Corps activities, of the organizational components and records involved in the transfer.

f. Transfer of Records of Decommissioned Ships and Disestablished Shore Activities and Aviation Squadrons

(1) Host commands of disestablished tenant shore activities

- (a) Publish guidance to be followed by disestablished tenant shore activities.
- (b) Provide local storage areas or network space for records with a retention period of less than 1 year. Maintain a record of storage box location (i.e., box list, floor plan, etc.), which permits easy access to stored records for reference and allows systematic disposal of records at the end of the 1-year retention period.
- (c) Conduct periodic review of stored records to ensure timely destruction of eligible records.

(2) Disestablished shore activities

- (a) Follow guidance of host command in preparing and transferring records.
- (b) Transfer records with less than 1-year retention period to the host command following their guidance. Mark both ends of all records storage boxes with the disposal month and year. Provide a detailed list of the material to the host command and to the immediate superior in command (ISIC).
- (c) Transfer records with more than 1-year retention period to the appropriate FRC following transfer procedures outlined in appendix A of this instruction. Provide copies of Standard Forms (SF) 135s with a detailed list of records transferred, to the host command ISIC, and DNS-5, CMC (ARDB) for Marine Corps Activities.

(3) Decommissioned ships. Transfer records following Part IV of this instruction. Provide copies of SF 135s with a detailed list of records transferred, to the host command, ISIC, and DNS-5. Type commanders of decommissioned ships will maintain the record copy of the SF 135s.

8. Procedures for Transferring Records to Federal Records Centers. When transferring Naval/Marine Corps records to FRCs, the detailed procedures contained in appendix A must be followed. Problems arise when these procedures are not followed. No DON command or activity is exempt. If correct transfer procedures are not followed or proper records transfer documents not provided, the entire records shipment will be returned to the transferring command or the ISIC for correction.

9. Destruction of Records in the Custody of FRCs. The Federal Records Center (FRC) will forward records destruction request to the organization/owner as stated on the SF-135 via, a NA Form 13001, "Notice of Intent to Destroy Records". This will be done 90 days prior to the date that the records disposition allows the records to be destroyed. The NA Form 13001 must be completed and returned to the FRC before the records will be destroyed. Prior to signing the NA Form 13001, the command will ensure that there are no actual or pending litigation freeze/holds on the records about to be destroyed. If there is an actual or pending litigation freeze or hold on the records, they cannot be destroyed. The command shall get concurrence with its legal department/counsel before destroying any records. If there is a question on the legal status of records Navy command shall contact CNO/DNS-5 and Marine Corps commands shall contact CMC (ARDB). The organization/owner shall keep a copy of the NA Form 13001 and a copy of the SF-135 as an audit trail.

10. Access and Reference to Records Transferred. NARA and FRCs provide prompt reference service on or access to records in their custody under the conditions outlined in subparagraphs a and b below.

a. NARA The Archivist of the United States is authorized to grant access to or release information from the permanent Navy and Marine Corps unclassified records in NARA's legal custody per the Freedom of Information Act.

b. FRCs. FRCs will furnish information or documents only by authority of the record group manager. Requests for access or information from other than authorized personnel will not be honored. If the activity has been disestablished, obtain approval from the cognizant records manager if record group manager is unavailable contact DNS-5.

c. Reference Services Provided. The NARA and the FRCs normally provide:

- (1) Information over the telephone (in emergencies only);
- (2) Authenticated copies of documents (for a fee);
- (3) Original documents on a loan basis; and
- (4) Information extracted from the records (provided prior arrangements are made and personnel are available).

d. How to Obtain Reference Service from NARA or FRCs. Requests for FRC reference services shall be made in writing on Optional Form (OF) 11 directly to the Records Center by the requesting activity. Centers also will grant authorized personnel access to review the records at the centers (see appendix B). Requests for reference service from the NARA shall be made only through command records managers.

e. Withdrawal of Records from the NARA or FRCs. Records transferred to the custody of the FRCs may be withdrawn for reference on a 30-day loan basis as outlined in subparagraphs c and d.

f. Return of Loaned Records to the FRCs. Check the procedures in appendix B, paragraph 5 for returning loaned records.

11. Cutting off Records/Files. To cut or break files, terminate a record series on a given date or after a specified event or action. Files should be cut off or broken periodically in order to facilitate disposal actions and reference to current records.

a. Establishing Cut Off Periods. Establish specific cut off periods for each record series accumulated. This allows disposal or transfer to occur in uniform chronological blocks.

(1) Terminate correspondence files and most other general files, as well as numerical files or documents, annually at the end of the calendar year. Break fiscal and

accounting records annually at the end of the fiscal year.

(2) Terminate case files when action has been completed or upon the occurrence of a particular event or action. For example, certain contract files are removed from the current file and placed in the completed file when all shipments have arrived or final payment under the contract has been made. Some personnel records are removed from the current file on the occurrence of a particular event, e.g., when an individual is separated.

(3) If files are eligible for destruction when less than 1 year old, they should be cut off at shorter intervals. For example, cut off files eligible for destruction when 6 months old at the end of 6 months; those eligible for destruction when 3 months old at the end of 3 months. Consider continuity, use, and volume, as well as the retention period, as factors. A good general rule to follow is to set cut off periods according to the volume and retention period.

b. Retiring Cut off Files. Move cut off or terminated files to lower file drawers or to other less convenient office spaces.

c. Restrictions on transferred records

(1) Freedom of Information Act (FOIA). Restrictions may be necessary or desirable on the use or examination of specific records. These restrictions must be justified and the statute or FOIA exemption (5 U.S.C. 552(b)) must be cited that authorizes placing restrictions on the use or examination of records being considered for transfer. If NARA agrees, restrictions will be placed on the records.

(2) Records less than 30 years old. Unless required by law, NARA will not remove or relax restrictions placed upon records less than 30 years old without the concurrence in writing of CNO (DNS-5), or CMC (ARDB) for Marine Corps activities.

(3) Records 30 or more years old. After records have been in existence for 30 years or more, statutory or other restrictions shall expire unless NARA determines, after consulting with CNO (DNS-5), or CMC (ARDB) for Marine Corps activities, that the restrictions shall remain in force for a longer period. NARA has identified specific categories of records, including classified information and information that would invade the privacy of an individual, which may require extended protection beyond 30 years.

(4) Privacy Act (PA). For records constituting systems of records subject to the Privacy Act of 1974 (5 U.S.C. 552a), CNO (DNS-5), or CMC (ARDB) for Marine Corps activities, shall attach the most recent Navy Privacy Act system notice covering the records to the SF 258.

12. Retiring Records to Local Storage Areas. Most Naval/Marine Corps records are short-term temporary records eligible for destruction in less than 2 years, and the

bulk of these have retention periods of 1 year or less. These short-term records (retention periods of less than 1 year) should be cut off at regular intervals, retired locally, and destroyed by the accumulating activity as soon as their retention periods have expired. Generally, it is not economical to transfer them to FRCs.

a. **Establishing Local Storage Areas.** Some activities have found it advisable and economical to establish local records storage facilities for short-term temporary records. See appendix F for Navy records centers standards. Establishment of such local facilities is permissible under the following conditions:

(1) The records storage area is less than 5,000 square feet and records being held are less than 1 year old. When the parameters are exceeded, the holding area is considered a Navy records center and the standards of appendix F must be applied.

(2) The records storage area is unattended. Necessary references to the records are provided by the file unit or other organization retiring the records. If additional personnel resources are required to maintain a records holding area, FRCs can provide more economical storage.

(3) Records are stored without the use of specialized storage equipment. If specialized storage equipment is required, the FRCs can provide more economical storage.

(4) Unused storage-type space is locally available, e.g., in basements, vacated warehouses, or other unoccupied space that is not suitable for normal office use. Usable office space should not be used.

b. **Records Eligible for Local Retirement.** The following records may be retired to local storage areas:

(1) Short-term records eligible for destruction in less than 1 year; and

(2) Long-term records that must be retained close at hand until frequency of reference to the records will permit their transfer to an FRC.

Establish specific retirement periods for records eligible for local storage, taking into consideration the volume, use, and frequency of reference to the records.

13. **Temporary Records Interfiled With Other Records.** Dispose of records series as a "block" wherever possible. Documents that must be maintained for substantially longer or shorter periods of time than other portions of the file should be physically separated and filed as individual records series. While physical separation of these records is preferable, some file series—such as general correspondence files—may contain material having different retention values. When the file volume is small and the difference between retention periods is not

substantial, the entire file may be retained as a "block" and disposed of upon expiration of the longest retention period applicable. But when the differences are substantial, identify each file category and mark appropriately for disposal as a separate records series. Moreover, identify and clearly mark any temporary records interfiled with permanent records. Any temporary records interfiled with permanent records must be removed before storage in an FRC.

14. **Personal Papers.**

a. "Personal Paper" are documentary materials, or any reasonably segregable portion thereof, in any media including hard copy or electronic, of a private or nonpublic character that do not relate to, or have an effect upon, the conduct of agency business. "Personal papers" can include e-mail as well as other electronic formats. "Personal papers" are excluded from the definition of Federal records and are not owned by the Government: Examples of personal documents include:

(1) Materials accumulated by an official before joining Government service that are not used subsequently in the transaction of Government business;

(2) Materials relating solely to an individual's private affairs, such as outside business pursuits, professional affiliations, or private political associations that do not relate to agency business; and

(3) Diaries, journals, personal correspondence or other personal notes that are not prepared or used for, or circulated or communicated in the course of, transacting Government business.

b. "Personal papers" shall be clearly designated as such and shall at all times be maintained separately from the office's records.

c. If information about private matters and agency business appears in the same document, the document shall be copied at the time of receipt, with the personal information deleted, and treated as a Federal record.

d. Materials labeled "personal," "confidential," or "private," or similarly designated, and used in the transaction of public business, are Federal records subject to the provisions of pertinent laws and regulations. The use of a label such as "personal" is not sufficient to determine the status of documentary materials in a Federal office.

e. "Personal papers" category does not apply to calendars, appointment books, schedules, logs, diaries, and other records documenting meetings, appointments, telephone calls, trips, visits, and other activities of Federal employees while serving in an official capacity, if they are prepared or used for, or circulated or communicated in the course of, transacting Government business.

15. Preservation of Facsimile Transmissions as Federal Records

Facsimile transmissions have the same potential to be Federal records as any other documentary materials received in Federal offices. They are Federal records when (1) they are received in connection with agency business and (2) they are appropriate for preservation as evidence of agency organization and activities or because of the value of the information they contain. Facsimiles that are Federal records should be filed in accordance with the guidelines set forth in this manual.

a. All thermal paper facsimiles that are Federal records should be copied on plain paper at the time of receipt.

(1) This guidance does not apply to advance copies of materials on which no documented administrative action is taken. Such advance copies are non-record materials and may be destroyed immediately upon receipt of the original document.

(2) This guidance does apply to advance copies if the receiving office intends to circulate the advance copy for official purposes such as approval, comment, action, recommendation, or follow-up. In such instances, the advance copy is a Federal record and should be treated accordingly.

b. Plain paper copies of facsimiles that are Federal records should be filed in accordance with the guidelines set forth in this instruction.

c. Commands that anticipate receiving large volumes of facsimile transmissions that are Federal records should consider purchasing a facsimile machine that produces plain paper copies by a xerographic process.

d. Facsimile message leaders, such as cover sheets, headers, and boxed notes, should advise the recipient to replace thermal paper facsimiles that are records with a plain paper copy. A recommended advisory is:

"WARNING: Most Fax machines produce copies on thermal paper. The image produced is highly unstable and will deteriorate significantly in a few years. It should be copied on a plain paper copier prior to filing as a record."

e. The guidance in this instruction should be incorporated into appropriate command directives and distributed to all offices that receive facsimile transmissions.

16. Data Created or Received and Maintained for the Government by Contractors

a. Contractors performing Congressionally-mandated program functions are likely to create or receive data necessary to provide adequate and proper documentation of these programs and to manage them effectively.

Commands shall specify the delivery to the Government of all data needed for the adequate and proper documentation of contractor-operated programs per recordkeeping requirements of this instruction and with requirements of the Federal Acquisition Regulation (FAR) and the Defense Federal Acquisition Regulation Supplement (DFARS).

b. When contracts involve the creation of data for the Government's use, in addition to specifying a final product, command officials may need to specify the delivery of background data that may have reuse value to the Government. Before specifying the background data that contractors must deliver to the agency, program and contracting officials shall consult with appropriate Government officials to ensure that all command and Government needs are met, especially when the data deliverables support a new command mission or a new Government program.

c. Deferred ordering and delivery-of-data clauses and rights-in-data clauses shall be included in contracts whenever necessary to ensure adequate and proper documentation or because the data have reuse value to the Government.

d. When data deliverables include electronic records, the command shall require the contractor to deliver sufficient technical documentation to permit the command or other Government agencies to use the data.

e. All data created for Government use and delivered to, or falling under the legal control of the Government are Federal records and shall be managed per records management legislation as codified at 44 U.S.C. chapters 21, 29, 31 and 33, the FOIA (5 U.S.C. 552), and the PA (5 U.S.C. 552a), and shall be scheduled for disposition per this instruction.

17. Electronic Records. Department of the Navy electronic records, which include e-mail, and other electronic record formats shall be managed IAW DOD 5015.2-STD.

a. Definition. Any information created, received, transmitted, maintained, or managed as an organization record that can be read by using a computer or any other electronic device, that satisfies the definition of a Federal record, shall be considered an electronic record. This includes, but is not limited to, records stored in digital or analog form, regardless of medium, simply put; a "record" consists of information, regardless of medium, detailing the transaction of business. Electronic documents are records the same as paper documents. In regards to disposition, there is no difference between managing electronic and paper records.

b. Creation. Before a document is created on an electronic records system that will maintain the official file copy, each document must be identified sufficiently to enable authorized personnel to retrieve, protect, and

dispose of it.

c. **Naming Files.** Naming electronic files can be done a number of ways. One way is to treat them the same as paper file folders. When naming subdirectories or 'folders,' use the SSIC number and any logical combination of alphanumeric characters permitted by the operating system and description of the series. For example, a subdirectory labeled 5240 would show General Administration and Management files containing correspondence on industrial methods that are destroyed after 5 years.

Another solution would be to use any naming convention that your command is comfortable with. The SSIC's and current record dispositions found in this manual can then be attached to the record or its file folder. The end state is that the user needs to know which SSIC and disposition to apply to each named file so the record life cycle can be adhered to. The owner must know when to dispose, transfer or destroy the electronic records. Unless the record holder is able to find a method of applying an SSIC/disposition to their electronic records their records holdings will not be compliant.

d. **Electronic Mail** shall be saved via a DOD 5015.2 STD certified application. Additional filing guidance can be found at C2.2.4 within the DOD standard. The following standards for management of e- mail records must be met:

(1) Transmission and receipt data must be preserved for each electronic mail record in order for the context of the message to be understood.

(2) Electronic mail systems that identify users by codes or nicknames or identifies sender and addressee(s) only by the name of a distribution list shall include as part of the record the true identity of sender and addressee(s) by employee name(s) or position(s).

(3) When using an electronic mail system that allows users to request acknowledgements or receipts showing that a message reached the mailbox or in box of each addressee, or that an addressee opened the message:

(a) Require acknowledgements or receipts be used only when the information is important to the mission as evidence of the transaction of official business.

(b) Preserve acknowledgements and receipts as part of the record.

(4) Electronic mail systems with the capability to access external electronic mail systems shall ensure that records sent or received using this capability are managed the same as other electronic mail records.

(5) Calendars and task lists provided for use by users of some electronic mail systems may meet the definition of a record, and shall be managed accordingly.

(6) Any recordkeeping system (electronic or non-electronic) that includes the content of electronic mail messages must:

(a) Provide for the grouping of related records into classifications according to the nature of the mission the records serve.

(b) Permit easy and timely retrieval of both individual records and files or other groupings of related records.

(c) Retain the records in a usable format for their required retention period as specified in approved records schedules.

(d) Be accessible by individuals who have a mission need for information in the system.

(e) Preserve transmission and receipt data.

(f) Permit transfer of permanent records to the National Archives and Records Administration.

e. Electronic Mail Records Storage

(1) Electronic mail messages that have been determined to be records may be stored only on the electronic mail system when the electronic mail system meets the DOD 5015.2-STD C2.2.5.

(2) When electronic mail messages are not stored on the mail system, users shall receive training on the procedures for copying or moving records from the mail system to an approved recordkeeping system.

(3) When a mail record is migrated to another medium (e.g., paper, microfiche) for storage, related transmission and receipt data shall be included as part of the record.

f. Electronic mail records may not be destroyed or otherwise disposed of except under the authority of an approved records schedule. This applies to the original version of the record that is sent or received on the electronic mail system and any copies that have been transferred to a recordkeeping system.

(1) When the necessary steps have been taken to retain an electronic mail message in a recordkeeping system, the identical version that remains on the user's screen or in the user's mailbox may have no continuing value. Disposition of the version on the electronic mail system is authorized after the record has been properly preserved and scheduled in a recordkeeping system along with all appropriate transmission and receipt data.

(2) The disposition of electronic mail records that have been transferred to an appropriate recordkeeping system is governed by the approved records schedule(s)

that controls other records in that system. When the records in that system have not been scheduled, they may not be destroyed. IAW Assistant Secretary of Defense memorandum, subj. Electronic Mail Records and Electronic Mail Retention Policies for the Department of Defense (DOD), dtd. May 22, 2005. E-mail records that meet the definition of a record as defined in DOD Directive 5015.2, "DOD Records Management Program," March 6, 2000, may be converted to a paper copy, then scheduled for disposition within approved paper-based records management procedures for e-mail records. There is also an option to manage e-mail records electronically with applications that are compliant with DOD 5015.2STD, "Design Criteria Standard for Electronic Records Management (ERM) Software Application" June 19, 2002. Non-record email, when practical, shall be destroyed within 180 days of creation

(3) When eligible for destruction, the electronic version of an electronic mail message should be destroyed in the same manner prescribed as for other electronic records.

PART II

APPLYING RECORDS RETENTION STANDARDS

1. Records Retention Standards. Records retention standards prescribed for naval records are contained in parts III, IV and V of this instruction. The authorities they contain are applicable to the records they describe and are accumulated by Navy and Marine Corps activities ashore and afloat throughout the naval establishment and to individual USN and USNS ships. Limitations on the use of individual standards are indicated in the description of the records. The records retention standards are the basis for the establishment of activities' records disposal programs. They prescribe how long records are to be kept, whether short-term or long-term, and provide authority for:

a. The Preservation of Records Described in Parts III, IV and V of this Instruction as Permanent. Identify and mark these records for preservation and transfer to the appropriate Federal Records Center (FRC). Eventually the records will be offered to the National Archives and Records Administration (NARA).

b. The Periodic Destruction of Temporarily Valuable Records. Retention periods for these records are expressed either in terms of time or the occurrence of a particular event or action. Temporary records are to be held by the naval activity or an FRC for the prescribed retention period and then destroyed.

c. Appraising Records to Determine Retention Standards. Liaison for appraisal of records to determine retention standards is CNO (DNS-5) for Navy records and CMC (ARDB) for Marine Corps records. In appraising records to determine their current retention standards, first determine which records have research, legal, historical, or scientific values that are worthy of preservation. The remaining records then are temporary records. Appraise these to determine how long they will be needed in the conduct of the DON's business before they can be destroyed. Naval/Marine Corps records appraised as "permanent" are few in volume, but these records are vital. They protect Navy and Marine Corps interests and document significant experiences. While there are some exceptions, most "permanent" records are at the departmental or fleet command level, i.e., departmental offices, systems commands, flag commands of the operating forces, and research activities. This is logical since these activities formulate and prescribe policies and procedures to be carried out by other organizations. Included among records designated for permanent retention are the primary program files of unique-type activities that may be valuable for historical or research purposes. Also included are primary program records of one of several similar activities retained as a sample of the functions performed. Permanent files are designated in this instruction under the SSIC subject heading pertaining to the activity or organization's primary function or mission.

d. Local Historical Records. Records briefly summarizing the history of an activity sometimes may have continuing value to the local activity, but may not have permanent value to the DON as a whole. Whether or not an activity's program file is designated specifically as permanent in parts III, IV and V of this instruction, these few historical documents may be appropriate for long term retention on site by the individual activity provided the commanding officer approves. Furthermore, if such records are designated as permanent in parts III, IV and V of this instruction and are over 30 years old, they must be transferred to NARA.

e. Establishing Retention Standards. Standards are developed based on: (1) recommendations of headquarters activities that sponsor the SSIC under which the records or files are identified; and (2) general government-wide standards pertinent to Naval/Marine Corps records. CNO (DNS-5) or CMC (ARDB) who then obtain the comments and/or concurrences of cognizant activities and other commands concerned may also initiate them. The concurrence of other government agencies is obtained where appropriate or required. CNO (DNS-5) submits proposed retention standards to the Archivist of the United States for final approval. The Secretary of the Navy in parts III, IV and V of this instruction then issues the approved retention standards.

f. How Standards are Coded. Records retention standards are numbered according to SECNAV Manual M-5210.2 (the Department of the Navy File Maintenance Procedures and SSIC). They are divided into 13 chapters and arranged under the same 13 major subject headings provided by the SSIC Manual. Each chapter is segmented within 13 major classification series to primary, secondary, and tertiary levels, as needed. The appropriate retention authority for records will be found under the same subject classification number used for filing documents and for numbering instructions, notices, messages, reports, and forms. This interlinking of file maintenance and disposal codes makes it easier to locate and properly apply the applicable retention standards. All disposal authorities for military personnel records, for example, are coded under the 1000-1999 series of the SSIC Manual. Disposal guidance for these records is found under the 1000-1999 series in chapter 1, part III, of this instruction. All disposal guidance for administrative records is found under the 5000 series in chapter 5, part III, of this instruction. For a more specific example: SECNAV Manual M-5214.1 is the directive that requires activities to establish a Reports Management Program and prepare Reports Analysis Data Forms (OPNAV 5214/10) Report Control Symbol (OPNAV 5214-1). The SSIC for "reports management" is 5214. Any correspondence created in this area would carry the 5214 SSIC. Disposal authority for "Reports Management" is found in paragraph 5214, chapter 5, part III, of this instruction. For easy reference, all SSIC's with disposal authority are listed in appendix I of this manual.

g. How Records are Described. In most instances, records are described in general terms. This general

grouping allows for minor differences in terminology or for the local character of the records. It also makes disposal instructions fit most naval activity records.

h. How Standards are used. Many retention standards are broad and local file series will not exactly match the general retention standards specified in parts III, IV and V of this instruction; i.e., records need not always be identical to those described in the general retention standards prescribed in this instruction, but the records must:

- (1) be similar in nature;
- (2) document the same or essentially the same information; or
- (3) perform the same or similar purpose.

Moreover, the retention periods contained in parts III, IV and V of this instruction will not be exceeded. They should not be stretched to cover other significant records. While most standards for naval records are broad, some are narrower in scope and more specific. Be careful not to apply the broader standards to several individual records when separate and more specific standards are prescribed. Supporting documents and other closely related papers may be disposed of on the basis of disposal authority selected for the basic documents when specific disposition authorities are not provided.

2. Deviations from Retention Standards. If unforeseen circumstances make it necessary to retain records longer than prescribed in this instruction, advise CNO (DNS-5), or CMC (ARDB) for Marine Corps activities, via the administrative chain of command, giving the reasons and requesting an extension of the retention period. If it appears the extension should be applied Navy/Marine Corps-wide, recommend a change in retention standards for those particular records. It is unlawful to dispose of records before expiration of the retention period.

3. Exceptions to Standards when Litigation, Investigations, and Exceptions are Pending. Regardless of the retention standards established by this instruction, records pertaining to: (a) unsettled claims for or against the Government; (b) current or pending litigation; (c) incomplete investigations; or (d) exceptions taken by the General Accounting Office or internal auditors will not be destroyed, but retained, until the litigation is settled, the investigation is completed, or the exception is cleared. Segregate and retain records directly pertinent to the litigation, investigation, or exception until all actions are completed. The remainder of the file may be disposed of as scheduled.

4. Establishing New or Revised Standards. All groups of naval records should be covered by the retention standards in this instruction; however, any records not covered cannot be destroyed and must be treated as "unscheduled records." If a category of records is found for which a retention standard is not provided, or if a change to a

present standard is needed, recommend the new or revised retention standard to CNO (DNS-5), or to CMC (ARDB) for Marine Corps activities, via the administrative chain of command. Recommendations should not be submitted for nonrecord material; this material is disposable at the discretion of the commanding officer after its nonrecord status has been determined. (See appendix C, paragraph 69, for definition of non record material.) As a rule, recommendations for slight reductions in retention standards, such as from 1 year to 6 months, should not be made. The benefits do not justify the paperwork. Retention periods of less than 1 year should be recommended only for bulky, rapidly accumulating file series. When recommendations for retention periods of less than a year are made, they should be fully justified. Include the file volume, annual growth rate and assurance that the short period is realistic and actually will be applied.

a. Submission of Disposal Standards. Recommendations for new or revised standards should be submitted on a Standard Form 115 and contain the following information:

(1) The name of the activity, types of activities or other organizational units accumulating the records.

(2) A brief description of the records series. This should include information regarding the use and purpose of the records, any requiring instructions, and type of records, i.e., reports, correspondence, charts, magnetic tapes, computer listings, punched cards, etc.; SECNAV Manual M-5210.1.

(3) A retention paragraph stating how long the records should be kept. (For example: Destroy when 2 years old.)

(4) A standard transfer period:

(a) When the proposed retention period is more than 1 year, include an FRC transfer date after the records have served their reference value.

(b) When the proposed retention period is permanent, include a transfer date to an FRC and an offer date when the records can be transferred to NARA legal custody. Normally NARA accessions permanent records when 20-25 years old. However, permanent machine-readable records should be transferred as soon as possible.

(c) When the proposed retention period is 1 year or less, transfer to an FRC is not necessary. Records should undergo periodic file breaks and be retired to local, in-house storage areas.

(5) Justification for proposed retention period. This is particularly important when the records are recommended for permanent retention or if it appears those recommended for early destruction may have continuing or permanent administrative, legal, research, or

historical value. Indicate local administrative needs for the records as well as known requirements of others. List the uses made of the records, by whom, and how often. Where relevant, cite any governing statute or regulation (i.e., Office of Personnel Management or Occupational Safety and Health Administration regulation or Comptroller General decision).

(6) Known duplication, including the location of other copies and the existence of related records or information and their use.

(7) A representative sample when establishment of a new retention period for temporary records is recommended. Any samples of forms must be filled in.

(8) Volume and inclusive time periods of nonrecurring, discontinued records.

(9) Annual cubic foot accumulation and accumulation to date for records recommended for permanent retention. If machine readable records, give the number of reels.

(10) Description and retention period for each medium used to create records (i.e., paper, microfilm, computer tape, etc.).

5. Responsibility for Applying Standards. Each Navy activity will program its records, regardless of media, for orderly retention and disposal following the standards and procedures prescribed in this instruction. Effective programming requires:

a. Designation of specific or general authority for administering and applying records disposal standards within the activity. The overall centralized control of each activity's disposal program is desirable even though file maintenance may be decentralized. In a large activity, however, responsibility may be delegated to specific organizational units of the activity provided an individual within that organizational unit is made responsible for file maintenance and disposal.

b. Determination of the disposal instructions applied to each record series the activity accumulates, based on the standards contained in parts III, IV and V of this instruction and on a local records inventory.

c. Local posting of disposal control instructions by placing pertinent disposal instructions on file folders, disk folder, reel canister, file drawers, or cabinets, as appropriate (see paragraph 6, step 4). Publication of local schedules or records listings is not required or necessary.

d. An annual inspection and review of local disposal procedures and of the activity's records to ensure that:

(1) records disposal and retention procedures are current, adequate, understood, and applied regularly and effectively; and

(2) proper retention standards have been applied to all records accumulated.

6. Applying Standards Initially. The following steps are recommended for initially establishing disposal programs or applying this instruction:

a. Step 1. Inventory all records, including machine readable, accumulated by each organizational unit to be covered. From this inventory you will be able to prepare a concise description of each series; determine file arrangement, use, volume, and location; and match each record series with the appropriate retention standard in this instruction.

b. Step 2. Analyze inventory data and records series to determine:

(1) the proper retention standard applicable to each;

(2) material is properly categorized as nonrecord (see appendix C, item 69) and designated for destruction when its purpose has been served; and

(3) any records that are not covered by the retention standards.

Use the index to this instruction for this appraisal process, but also consider carefully the purpose and function of each record series and the scope of the disposal authority contained in this instruction. Give special attention to general correspondence files; they frequently consist of more than one record series. Each SSIC in the general correspondence files should be reviewed to determine any SSICs that may comprise distinct record series. Housekeeping and administrative operations records, for example, should be identified, retired, and destroyed as a separate series; they should not be treated the same as more important policy and program files.

c. Step 3. Establish specific cutoff and retirement periods for each record series. Offers of permanent records to NARA on a SF 258 will be made via the administrative chain of command to CNO (DNS-5) and CMC (ARDB).

d. Step 4. Prepare disposal control guidance for each record series (based on information gathered in previous steps) and post on file cabinets, drawers, guides, or folders, as appropriate. Include the following information in abbreviated form:

(1) SSIC and title;

(2) specific cutoff dates, and, if applicable, transfer dates;

(3) retention period or disposal date; and

(4) paragraph number from parts III, IV and V containing authority for the retention period being applied.

Accomplishment of this step notifies file personnel and others of disposal actions to be applied to each records series. It eliminates the need for preparation and issuance of local records disposal schedules or instructions containing detailed disposal information for individual record series.

e. Step 5. Take action immediately to apply disposal instructions to eligible records.

(1) Destroy records which have expired retention periods. Consult the local representative of the NARA volume to be destroyed is sufficient to justify recycling.

(2) Retire inactive records to be destroyed locally to local storage area. Include short-term temporary records eligible for destruction in the near future.

(3) Transfer long-term records not eligible for destruction in the near future to the appropriate FRC if authorized to do so in parts III, IV and V of this instruction.

f. Step 6. Appraise any records that are not covered by authorized disposal instructions. Develop a disposition schedule and submit it through the administrative chain of command to CNO (DNS-5), or to the CMC (ARDB) for Marine Corps activities on an SF 115. Procedures for submitting proposed changes to record retention standards are contained in paragraph 4, part II.

g. Step 7. Schedule Disposal Actions. Once you establish a local records disposal program, plan for future records disposal on a regular, periodic basis--preferably annually at the end of the calendar year. Within 1 month from the file break date, destroy, retain, or transfer all eligible files (less Fiscal Year files). Records can be eligible for destruction every day; however, it is not practical to destroy or transfer records too frequently or in very small quantities. Maintain fiscal files on a fiscal year basis and dispose of at the end of the fiscal rather than the calendar year. They may also be held for an additional 3 months and disposed of with other eligible records at the end of the calendar year.

h. Step 8. Keep Local Guidance Current. Determine retention standards for new files as soon as they are established. Create new file labels and revise local records disposal guidance promptly as changes occur.

i. Step 9. Make annual reviews of disposal procedures. Take follow-up action as necessary.

j. Step 10. Keep Statistics on Volume of Records Held. Maintenance of statistics on volume (cubic feet) of records held in both office space and local storage areas serves as a check on the effectiveness of the local records disposal programs. Whenever there is an increase in the volume of

a records series on board, immediately determine the reason for the increase. If the increase is due to non-compliance with disposal instructions, take remedial action.

RESEARCH, DEVELOPMENT, TEST, AND
EVALUATION (RDT&E) RECORDS

Records in this section (SSIC 3900-3999) are created by activities in connection with Technical and Specific Research and Development (R&D) Programs relating to the development of new concepts, Techniques, Weapons, Equipment, and Materials, or The Improvement, Modifications, or Refinement of Existing Techniques, Weapons, or Materials. They involve all phases of Research and Development, including planning and the establishment of requirements and preliminary characteristics, experimentation, design, engineering, modification, testing, and acceptance. They are accumulated by research laboratories, test and development centers, stations or units, proving grounds, facilities, and other research and development or testing activities or offices. They include basic records created by research and development activities that have lasting scientific or research values, such as those that document

program direction, review, and appraisal or analysis; the research activity's over-all organization, functions, procedures, and operations; or the conduct of individual projects and scientific and technical results and conclusions that may be useful for future research. Scientific data accumulated during the accomplishment of a specific project generally are reflected in laboratory notebooks and in progress reports. The reports reflect the progress and final results of the research effort. When specific research projects are of long duration, much data of a repetitive, continuing nature may accumulate from such processes as tests or experiments. The data are usually recorded in rough notes, on punched cards, electronic tapes, computer print outs, or comparable media, and then condensed in published reports or statistical summaries so scientists may use it for comparative or other purposes. When the data is thus retained in condensed form, the source material may be considered disposable. Technical reports and other data accumulated by private commercial or research organizations performing research functions under Navy contract are included in the 3900-3969 series. The term "project" as used here applies to projects, subprojects, tasks, or project phases. Where feasible, it may be desirable to consolidate related records into a single project file. But if projects are of long duration and the volume of records is large, records relating to individual subprojects, tasks, or phases may be cut off and retired to federal records centers or local interim storage upon completion of the subproject, task, or phase and in the same manner as for contract case files covered under SSIC 4200 of this manual.

SHIP SYSTEM PERFORMANCE

1. These Records Document Technical Functional Guidance which Addresses the Physical, Economic, Decisions which Constrain the Options Available for Providing an Effective Integrated Operational Naval Force. Operations analyses are performed to determine the technical requirements imposed by the mission, threat and environment. Concepts to perform the required missions are developed and evaluated to determine those most cost effective to satisfy the need or requirement of the mission. Operational requirements for each concept are analyzed by use of analytical models to establish optimized ship performance requirements. They determine the thresholds of performance used in trade-off decisions. Required technical support is included. Records include ship system performance concepts - displacements, endurance, maneuverability, noise characteristics, reaction time, speed; ship subsystem performance concepts, advanced development objectives, development concept papers, proposed technical approaches and specific operational requirements.

PART V

RECORDS OF ARMED CONFLICT

This section pertains to records created by participating units during periods of Armed Conflict. When executed by proper authority the provisions of this section will supersede the disposition instructions provided elsewhere in this manual for records created by Naval Component Commanders, Subordinate Commanders, and Individual Units participating.

At the conclusion of periods of armed conflict, wars, hostile actions against U. S. Forces, and other combat situations, it is necessary to analyze fully the actions and reactions of both friendly and enemy forces across the full spectrum of the conflict. In order to accomplish this rigorous operations analysis, full and complete documentation of all phases of the operation, including all intelligence, climatic, and other external information available to command, must be preserved and transferred to the activity designated to perform this analysis. The purpose of this analysis is to assess the effectiveness of weapons and tactics, suggest methods of improvement that have been tested in actual combat situations, determine adjustment required to force composition and systems design, and justify future budget decisions. At the conclusion of the operations analysis phase it is equally important that this documentation be made available to the Director of Naval History and the Director of Marine Corps History so that the official histories and historical analyses can be prepared and made available to the public.

THE PROVISIONS OF THIS SECTION WILL BE EXECUTED ONLY UPON THE AUTHORITY OF THE SECRETARY OF THE NAVY, THE CHIEF OF NAVAL OPERATIONS OR THE COMMANDANT OF THE MARINE CORPS, AND MAY BE MODIFIED AT THE TIME OF EXECUTION.

The cut off point for records will normally be the end of hostilities. However, interim cut off periods may be established for prolonged periods of conflict. Any modifications to the general provisions of this part will be contained in the executing order.

1. Records accumulated by Naval Component Commander, Subordinate Navy and Marine Corps Commanders, and Individual Navy and Marine Corps Units. Records consisting of operations plans/orders, provided with messages sent and received, voice communications logs, watch logs, reports of engagement, commanding officer narrative reports, strike briefings and debriefings, electronic records of the operation and performance of weapons and surveillance systems, intelligence reports and assessments, situation reports, after actions reports, command chronologies, weather observations, annotated charts and maps, records of enemy engagements, battle damage assessments, target lists, casualty reports, commander logs, and combat camera negatives and video tape. Exclude Marine Corps

command chronologies, including attachments thereto, which will be provided to the designated Operational Analysis Activity by the Director of Marine Corps History by other means. In addition to the above, special units will include records as indicated:

APPENDIX A

**FEDERAL RECORDS CENTERS' TRANSFER
PROCEDURES**

1. Federal Records Centers (FRCs). The National Archives and Records Administration (NARA) operates a system of FRCs authorized by sections 2903, 2907, and 3102 of Title 44 of the United States Code for the economical storage of noncurrent records of Federal agencies, pending their deposit in the National Archives of the United States or other disposition authorized by law. Non-current records are defined as records that are no longer required to conduct current business. Page A-4 lists the mailing addresses and commercial telephone numbers of the records centers and the geographic areas they service.

2. FRCs Records Transfer Requirements. The FRCs screens all incoming records boxes. If correct transfer procedures are not followed or proper records transfer paperwork is not provided, the entire records shipment will be returned to the transferring command or the immediate supervisor in command (ISIC) for correction. Adhere to the following requirements when preparing records for a records transfer to an FRC:

a. Records must be covered by an authorized records retention standard of this instruction and have a minimum of one year retention period at the FRC.

b. Forward original and one copy of Standard Form (SF) 135, Records Transmittal and Receipt, to the FRC for approval prior to shipping records. Hold one copy for your suspense file.

c. Records must be received by the FRC within 90 days (120 days for overseas locations and ships at sea) of their approving an SF 135.

d. The returned copy of the SF 135 must be placed in box 1 of the accession before the records are sent to the FRC. If boxes or other containers are tightly sealed, place the shipment copy in an envelope taped to the outside of the first container.

e. Shipment of records must be in standard records center cartons marked with appropriate accession and agency box numbers.

f. Records of a given accession number must be covered by the same disposal authority and have the same disposal date.

3. Evaluating Records. Prior to packing boxes for transfer to an FRC, conduct a thorough evaluation of the records using the following guidelines:

a. Remove all duplicate copies and unnecessary material, i.e., notes, drafts, and working papers, or reference material such as instructions, notices,

publications, etc.

b. Separate records into series. A series is defined as a block of records having the same disposition authority and the same retention period.

c. Before packing classified records, make every effort to declassify or downgrade them under the provisions of SECNAVINST 5510.36(series) and SECNAV M-5510.36, Information Security Program Regulations. Those records that cannot be declassified should be carefully inventoried and shipped per security regulations contained in SECNAVINST 5510.36(SERIES) and SECNAV M-5510.36.

4. Preparing Records Transmittal Document. A separate SF 135 is required for each accession (permanent or temporary) sent to a FRC and a folder title list of box contents. Complete the SF 135 in triplicate following the instructions listed below:

a. **Block 1, TO.** Fill in the appropriate FRC mailing address of the center servicing your area.

b. **Block 2, AGENCY TRANSFER AUTHORIZATION.** A signature is mandatory. Administrative or directorate level personnel can sign the authorization.

c. **Block 3, AGENCY CONTACT.** List the person most knowledgeable about the records being shipped and a commercial or FTS telephone number. FRCs do not have access to DSN. If there is a problem, this is the person the FRC will contact.

d. **Block 4, RECORDS CENTER RECEIPT.** Leave blank. The FRC will complete this information.

Use series descriptions from records schedules (Part III).

(7) Column g, RESTRICTION CODE. Restrictions are explained on the back of the SF 135. Code "W" should be used for unclassified Privacy Act system records. Explain any special restrictions at the bottom of the page, if necessary.

(8) Column h, DISPOSAL AUTHORITY. Cite

the appropriate disposal instruction number, standard subject identification code (SSIC), paragraph and subparagraph number that prescribe the retention standard for the records you are transferring. For example, if the records you want to transfer were military disbursing officer original monthly and daily returns and related reports, you would cite disposal authority, SECNAV Manual 5212 and SECNAVINST/7250/2a.

(9) Column i, DISPOSAL DATE. Calculate the disposal date by guidance given in the disposition paragraph.

(a) A disposition paragraph reads: "Transfer to appropriate FRC when 5 years old. Destroy when 75 years old." If the records are dated February 1984, in February 1989 you would transfer them to the FRC and in February 2059 they would be eligible for destruction. Since disposition is carried out in quarterly cycles at the FRC, the disposal date would advance to the beginning of the next calendar quarter (i.e., January, April, July, or October of a given calendar year). Therefore, the actual disposal date for the records in this example would be April 2059.

(b) A disposition paragraph reads: "Permanent. Transfer to appropriate FRC when 4 years old. Offer to NARA when 20 years old." The disposal date would be last two digits of the year the records are eligible for offer to the National Archives. Place a "P" after the offer year.

After completion, forward the original and one copy of the SF 135 to the FRC. DO NOT SHIP THE RECORDS AT THIS TIME. The FRC will review the SF 135 authorizing shipment of the records.

5. Packing Records

a. Use the proper size records center carton when packing records. For legal- and letter-size material, use standard-size records center cartons. Use half-size or designated specialty boxes only for microfilm, index cards, or other odd-size material. Contact the FRC regarding shipments of odd-sized material (bound volumes, ledgers, maps and charts) that will not fit standard FRC cartons or for fragile items (glass plate negatives) that require special handling. Discuss with the FRC the packing requirements dictated by the size or nature of the records.

NOTE: Use only standard records center cartons available through General Services Administration. FRCs will reject any shipment of legal- and letter-sized records not in authorized records center-cartons.

b. Pack records in standard FRC cartons preserving the original file arrangement. Leave one inch of space per carton to permit easy withdrawal of folders for reference. Pack letter-size folders upright facing the numbered end, legal-size folders facing the "left" side of the carton. (See Page A-9)

NOTE: Do not over pack your boxes. Never add additional material on bottom, sides, or on top of the records. Never stack files on top of each other. Do not combine odd-sized and standard-sized records in the same shipment. Computer discs should only be packed in the special cartons available for them. They need to be packed vertically on their edges, never flat or horizontally, in standard FRC cartons.

c. Attach folder title lists of box contents, or equivalent detailed records descriptions, to SF 135 transmitting: (1) permanent records, (2) scheduled records which have been proposed for permanent retention on a pending SF 115, (3) records from which a sample is to be selected for permanent retention, and (4) records of agencies which routinely fail to screen case files under series with temporary and permanent sub-series. A separate SF 135 must be prepared for each accession of records in these categories. This information will help to ensure that archival records are identified. Place a copy of the FRC approved SF 135 and a folder title list of box contents inside the front of the first carton (agency box number 1, if there is more than one carton in the accession).

6. Marking cartons. Using a permanent black felt-tip marker, write the full accession number (items 6(a), (b), and (c) of the approved SF 135, i.e., 181-87-134) in the front upper left corner of each carton. Also, number the cartons sequentially (i.e., 1/10, 2/10, etc.) in the front upper right corner of each carton. (See Page A-8). For boxes with printed blocks, write the accession number and the box number in the designated printed blocks on each box.

NOTE: Do not use labels to mark cartons. No standard method of affixing labels is effective in long-term FRC storage. Write the accession number and box number directly on the box.

7. Shipping Records

a. Ship the records to the FRC as soon as possible after receipt of the FRC approved SF 135. Records must be received by the FRC within 90 days (120 days for overseas locations and ships at sea) after their approving an SF 135. Delays of more than 90 days (120 days) will result in the FRC canceling the accession number and rejecting any shipments received after 90 days (120 days for overseas locations and ships at sea). In this case, the transferring activity will be required to resubmit the SF 135, obtain approval for shipment, and renumber the cartons with the new accession number.

b. Accessions of more than 500 cubic feet require advance space and manpower planning. In such instances, notify the FRC in writing two weeks prior to planned shipment.

c. After the records have been shelved at the center, the FRC will return a copy of the SF 135 annotated with the location. KEEP THIS COPY AS A RECEIPT AND AS

YOUR PERMANENT RECORD.

8. Maintaining Record Copy of the FRC Stored Records. Use the FRC-acknowledged copy of the SF 135 as a record of material transferred. This eliminates preparation of separate inventory lists of records stored at the FRC, simplifies getting reference service to the stored records and eases answering various FRC notices. (See Appendix E for sample of notices you may receive from FRCs regarding retired records.)

NOTE: Attach folder title lists of box contents to the SF 135 for PERMANENT and UNSCHEDULED RECORDS ONLY. This is not a requirement by the FRC for transferring temporary records.

NOTE: WHEN TRANSFERRING SECRET AND TOP SECRET RECORDS, SECNAVINST 5510.36(series) REQUIRES THAT "CRADLE TO GRAVE" ACCOUNTABILITY BE MAINTAINED FOR SECRET AND TOP SECRET INFORMATION AND THAT IT BE TRANSMITTED UNDER A CONTINUOUS CHAIN OF RECEIPTS. TOP SECRET INFORMATION TRANSFERRED WITH IMPROPER RECEIPTS MUST BE RECONCILED WITH THE SENDING COMMAND.

WARNING: Classified Records are only accepted at the following FRC:

East Coast; The Washington National Records Center
West Coast; Federal Records Center, Seattle

REFERENCE SERVICE

- 1. Request reference service by letter or memorandum enclosing Optional Form (OF) II, Reference Request-Federal Records Centers. Using this form results in faster service. See sample of the OF II on page B-2.**

- 2. Include in the request the name of the naval activity; the name, location, and telephone number of the person for whom the request is being made; a full description of the information or records needed; and the box number, the Federal Records Center (FRC) location number, and the accession number. This information is available from the Standard Form (SF) 135. If there are no security restrictions, a small number of records can be returned to the agency by mail or United Parcel Service.**

- 3. All DON personnel visiting a center to examine records, including messengers picking up DON records, should carry appropriate credentials (a letter of authorization whose reference requests are honored at the FRC). In the case of classified documents, the individual must have written authorization to examine the records. Provide the security clearance of the visitor, messenger, or DON personnel to the FRC prior to arrival.**

- 4. When capability exists (i.e., equipment, personnel, etc.), certain records centers will provide reproductions of records unless it is contrary to DON restrictions, security requirements, or statutory limitations. Generally, DON requests for reproduction will be done without charge. An excessive number of requests for copies, however, may require the requesting activity to reimburse the National Archives and Records Administration (NARA). There is also a charge for certified copies. Requests for reimbursable microfilm services and other requests involving extensive use of technical facilities and personnel will be charged to the requesting activity based on a schedule of fees.**

- 5. To enable the National Archives or FRC to restore returned records which were withdrawn on a loan basis:**
 - a. Include a copy of the OF 11 used to withdraw the record(s).**

 - b. Ensure all records remain intact when a box is withdrawn. Return the entire box. If records must be reboxed, mark the outside of the box with the original accession number, location and box number. (See Appendix A, paragraphs 5 and 6.)**

 - c. Note, in pencil, accession number, location and box number on record(s) or file folder(s) when separate record(s) or file folder(s) are withdrawn.**

(Each individual voucher together with its supporting papers is a file unit.)

Since a variety of material is involved, it is best filed by subject so that relationships may be perceived readily. The use of the Navy-Marine Corps Standard Subject Identification Codes system (contained in SECNAV Instruction 5210.11C) is prescribed for these files. Under this system, numerical subject classification codes are designated for primary subject to fit the need of the individual activity or office. These are subdivided into secondary and tertiary codes, as necessary.

50. GENERAL RECORDS SCHEDULE. A schedule, issued by the National Archives, governing the disposition of specified recurring record series common to several or all Federal agencies. These schedules as they apply to DON records have been incorporated into Parts III and IV of this instruction.

52. HOLDING AREA. DON space used for the temporary storage of active or semi active records and for records with relatively short retention periods. Also known as a staging area.

53. HOUSEKEEPING AND ADMINISTRATIVE FILES. Records that relate to budget, fiscal, personnel, supply, and similar administrative operation, as distinguished from actual program records which document the activity's/command's primary function.

54. INACTIVE RECORDS. See NONCURRENT RECORDS.

55. INFORMATIONAL VALUE. The value of records that derive from the information they contain on matters with which public agencies deal.

56. LEGAL VALUE. The value of records that contain evidence of legally enforceable rights or obligations of governments and/or private persons.

57. MACHINE-READABLE RECORDS. Records whose informational content is usually in code and has been recorded on media, such as magnetic disks, drums, tapes, punched paper cards, or punched paper tapes, accompanied by finding aids known as software documentation. The coded information is retrievable only by machine.

58. MANUSCRIPT. A handwritten or typed document including a copy. A mechanically produced form completed in handwriting or typescript is also considered a manuscript.

59. MAPS AND CHARTS. Graphic representation at a reduced scale of selected physical and cultural features of the surface of the earth and other planetary bodies. These may include topographical quadrangles, cadastral plans, charts (hydrographic, nautical, weather, and aeronautical), photomaps, cartograms, globes, and relief models.

60. MICROCARD. An opaque card containing miniaturized pages photographically reproduced in a grid pattern by rows (like the numbers of a calendar). Microcards can be printed on one or two sides. They are used primarily for direct reading or when only a few permanent enlargements are needed.

61. MICROFICHE. Miniaturized images arranged in rows that form a grid pattern on card size transparent sheet film.

62. MICROFILM. A negative or a positive microphotograph on film. The term is usually applied to a sheet of film or to a long strip or roll of film that is 16mm, 35mm, 70mm, or 105mm in width and on which there is a series of microphotographs.

64. MICROPHOTOGRAPH. A photographic reproduction so much smaller than the object photographed that optical aid is necessary to read or view the image. The usual range of reduction is from 8 to 25 diameters. Also called microcopy.

65. NAVAL ACTIVITIES. Navy and Marine Corps activities.

66. **NAVAL RECORDS.** Navy and Marine Corps records; in some instances retention and disposal standards specifically designate Navy and/or Marine Corps records, but where "naval" is used it is intended to include both.

67. **NAVY RECORDS CENTERS.** See **RECORDS CENTER.**

68. **NONCURRENT OR INACTIVE RECORDS.** Those files not needed in the conduct of current business and which may be removed from office space and equipment without impairing current operation.

69. **NONRECORD (FILES) MATERIAL.** Materials not usually included within the definition of records. These are accumulated in the process of producing records, but they never acquire a "record" character and include:

- a. stocks of publications and other reproduced documents maintained for supply purposes;
- b. materials preserved solely for purposes of reference or exhibition in libraries of museums;
- c. duplicate copies of material maintained within the same organization when serving the same functional purpose;
- d. copies of reproduced or processed materials when other copies are retained elsewhere for official record purposes;
- e. extra copies of papers preserved solely for convenience of reference, e.g., reading files, and "follow-up" or "tickler" or "suspense" copies of materials that may be destroyed after a brief period; abstracts or briefs of material maintained for tickler purposes;
- f. privately purchased books and other papers relating to private personal matters and kept in an office only for convenience; and
- g. correspondence and other records of transitory value that have no value after action has been completed or that are received for information and require no action. Some examples of this nonrecord category are:

(1) published materials received from other activities or offices requiring no action and not required for documentary purposes;

(2) letters or other transmitting papers that add no significant information to the material submitted;

(3) catalogs, trade journals, and other documents or papers received from other Government agencies, commercial firms, or private institutions, that require no action and are not a part of a case upon which action is taken;

(4) working papers, preliminary or intermediate

drafts, reports and related papers, memoranda, preliminary worksheets, or notes and similar materials that are summarized in final or other form and that have no evidential or informational value once action has been completed since they do not relate to significant steps taken in preparing record copies of documents;

(5) reproduction materials such as stencils, hectograph masters, and offset plates;

(6) shorthand notes, stenographic notebooks, and stenotype tapes that have been transcribed;

(7) information copies of correspondence, memoranda, and other papers that require no administrative action;

(8) notices or other papers that are not the basis for official action;

(9) charts, diagrams, and other graphic materials, prepared from source material and used for briefing or training activities;

(10) statistical tabulating aids used incidentally in the documenting process;

(11) routine records used to control or facilitate actions;

(12) personal work papers, such as notes, rough drafts, cards, etc.; and

(13) library material, publications and other materials maintained by libraries exclusively for reference purposes.

(Some activities transfer their "record" copies of publications or research reports to their libraries where they are retained for the activities and may also be used for reference purposes. The fact that these are maintained in libraries rather than in the official files does not change the record character of publications so transferred; these still remain "record" material.)

70. **PAPERWORK MANAGEMENT.** Collectively, the techniques of managing the creation, maintenance, and disposition of records. See also **RECORDS MANAGEMENT.**

71. **PERMANENT RECORDS.** Records that have been appraised as having enduring values--historical, research, legal, scientific, cultural, or other values. Permanent records are those that will protect the DON's interests and that document its primary missions, functions, responsibilities, and significant experiences and accomplishments.

72. **PRIMARY PROGRAM FILES.** Files of an activity or office having primary responsibility for the establishment and development of general policies, plans, programs, and

procedures in designated functional areas. Activities creating or accumulating these records are formulating and prescribing procedures to be followed by other activities and offices. Most primary program records are accumulated by departmental activities; but Operating Force (Flag/General) commands, and some other major field commands also accumulate primary program files. Primary program files generally are permanent records.

73. PROGRAMMING RECORDS. The process of developing instructions spanning the complete life cycle of a records series from its creation to eventual destruction or preservation.

74. RECORDS. Those documentary materials that may not be destroyed without the approval of the National Archives and the Secretary of the Navy as promulgated in this manual. The statutory definition of records is "All books, papers, maps, photographs, or other documentary materials, regardless of physical form or characteristics, made or received by any agency of the United States Government under Federal law or in connection with the transaction of public business and preserved or appropriate for preservation by that agency or its legitimate successor as evidence of the organization, functions, policies, decisions, operations, or other activities of the Government or because of the informational value of the data contained therein." Some evidence of information concerning these matters is contained in practically all records. The immediate or future reference needs decide the relative importance of this documentation. Identification of those records that contain sufficient evidence or information to justify continued preservation is a principal part of the records disposal program. Guidance for making this identification is provided in this manual.

75. RECORDS CENTER. A facility equipped for the concentrated economical storage of noncurrent or inactive records and staffed to perform required reference, processing, disposal, and related services.

76. RECORDS DISPOSAL SCHEDULES. The administrative media used by the DON to obtain legal disposal authority for categories of naval records. When authorized by the archivist of the United States, these schedules grant continuing authority to dispose of identifiable categories of naval records that already have accumulated and that will accumulate in the future. This authority is issued to naval activities by this instruction.

77. RECORDS DISPOSITION. See **DISPOSITION**.

78. RECORDS DISPOSITION OFFICER. The official responsible for operation of a records disposition program.

79. RECORDS MANAGEMENT. That area of general administrative management concerned with achieving economy and efficiency in the creation, use and maintenance, and disposition of records. This includes fulfilling archival requirements and ensuring effective

documentation. See also **PAPERWORK MANAGEMENT**.

80. RECORDS MANAGER. The person responsible for or engaged in a records management program. Sometimes known as a records officer or records administrator. See also **ARCHIVIST**.

81. RECORDS STORAGE AREA. Space set aside, without specialized equipment or personnel for the economical local storage of relatively inactive noncurrent records that must be retained for an additional period before destruction or transfer to a records center. See also **HOLDING AREA**.

82. REPOSITORY. A place where archives, records, or manuscripts are kept. The word "depository" is sometimes used as a synonym for repository.

83. RESEARCH VALUE. The usefulness of records for research by the Government, business, and other private organizations, and by scholars in the humanities, social and physical sciences, administration, and other disciplines. See also **HISTORICAL VALUE**.

84. RETENTION PERIOD. The period of time that records must be kept before they may be destroyed. The period usually is stated in terms of years or months, but is sometimes expressed as contingent upon the occurrence of an action or event. When the retention period is expressed in terms of years or months this period is calculated commencing with the cut off date. A retention period is to be distinguished from a retirement period (see **RETIREMENT PERIOD**).

85. RETENTION STANDARD. A description of a series of records and their retention period approved by the Secretary of the Navy following current law or regulation. The retention period may be of a temporary or permanent duration.

86. RETIREMENT OF RECORDS. Removal of records from usable office-type space and equipment to local records storage area.

87. RETIREMENT PERIOD. The period of time which records are to be retained before being removed from a current files area to a designated local storage area. A retirement period is to be distinguished from a retention period (see **RETENTION PERIOD**).

88. SCRATCHING. Process of permanently removing, erasing, or obliterating recorded information from a medium, especially a magnetic tape or disk, which then may be reused. (Sometimes called **DELETING** or **ERASING**.)

89. SCREENING. The examination of records to determine the presence of documents eligible for destruction and the removal of such documents from the files prior to disposition of the remaining records.

90. SECURITY CLASSIFIED RECORDS. See **CLASSIFIED INFORMATION.**

NOTE: DESTRUCTION OF ELECTRONIC RECORDS.

Electronic records may be destroyed only in accordance with a records disposition schedule approved by the Archivist of the United States, including General Records Schedules and this instruction. At a minimum each command shall ensure that:

(a) Electronic records scheduled for destruction are disposed of in a manner that ensures protection of any sensitive, proprietary, or national security information.

(b) Magnetic recording media previously used for electronic records containing sensitive, proprietary, or national security information are not reused if the previously recorded information can be compromised by reuse in any way.

91. SEMI-CURRENT RECORDS. Records required so infrequently in the conduct of current business that they should be moved to a holding area or directly to a records center. See also **CURRENT RECORDS, NONCURRENT RECORDS.**

92. SERIES. File units or documents arranged following DON's filing system (Standard Subject Identification Codes) or maintained as a unit because they relate to a particular subject or function, results from the same activity, have a particular form, or because of some other relationship arising out of their creation, receipt, or use. (Sometimes known as a record series, series of records, or file series.)

93. TEMPORARY RECORDS. Records that need be retained for a specific period of time or until the occurrence of an action or event but that may then be destroyed, provided the destruction is accomplished under the provisions of this instruction. See also **CONTINGENT DISPOSAL.**

94. TICKLER FILE. A file arranged by date to facilitate selection of records for disposal when they become due.

95. TEXTUAL RECORDS/ARCHIVES. The term usually applied to manuscript materials, as distinct from cartographic, audiovisual, and machine-readable record.

96. TRANSACTION FILE. See **CASE FILE.**

97. TRANSFER OF RECORDS. Change of custodial responsibility for records by removal and assignment to another activity or office, or to a Federal Records Center, the National Archives, another Federal agency, a non-Government institution, or other non-DON recipient.

98. UNSCHEDULED RECORDS. Records for which no ultimate disposition has been determined. Naval records should not appear in this category.

99. WIDE AREA NETWORK (WAN). A system for linking together computers, terminals, printers, and other equipment that are located in extensively separated offices and buildings.

100. WORD PROCESSING (WP). Creating and modifying documents by using a computer, along with other hardware and related software.

101. WORK FILES. Temporary files in auxiliary computer storage. Sometimes called processing files.

102. WORKING PAPERS. Documents such as rough notes, calculations, or drafts assembled or created and used in the preparation or analysis of other documents.

103. WRITE ONCE READ MANY (WORM). Of or relating to a type of optical disk on which information can be recorded only once but from which it can be retrieved and read many times.

APPENDIX D

**REIMBURSABLE MICROFILM SERVICE PROVIDED
BY FEDERAL RECORDS CENTERS**

1. Services. Federal Records Centers offer a wide range of microfilming services on a cost-reimbursable basis.

Services include:

a. Surveys. Micrographic system surveys are conducted to determine the feasibility of microfilm projects, format recommendations, and cost proposals.

b. Auxiliary services. These services include film processing, aperture card mounting, roll-to-roll duplication, microfiche duplication, and film inspection.

c. Security storage. Centers store original silver halide microfiche negatives in environmentally controlled vaults.

2. Requests for Services.

a. The naval activity will be asked to provide instructions, specifying the location of the records to be filmed; the description of the records, including the volume, size, and physical condition; filming arrangement and the nature and frequency of additions, changes, deletions, etc.; the size and the format of the film to be used and the reduction ratio at which the documents are to be filmed; the type of microfilm reader to be used; and the number and type (silver, diazo, or vesicular) of reference copies.

b. Requests for assistance should be sent to the federal records center servicing the activities' geographic area.

APPENDIX E

**RECORDS DISPOSITION NOTICES ISSUED BY
FEDERAL RECORDS CENTERS**

1. Relocation of Records

a. Occasionally, it becomes necessary to move records within the Federal Records Center. When this happens, activities will be notified of the relocation. NA Form 13016, Notice of Accession Location Change, is mailed the month following the relocation. It is imperative that agency copies of Standard Forms (SF) 135 be annotated to show new location numbers for use in securing reference service.

b. For further information concerning the relocation of records, contact the Appraisal and Disposition Branch of the appropriate records center.

2. Records Disposal.

a. The Federal Records Center (FRC) will forward records destruction request to the organization/owner as stated on the SF-135 via, a NA Form 13001, "Notice of Intent to Destroy Records". This will be done 90 days prior to the date that the records disposition allows the records to be destroyed.

b. The NA Form 13001 must be completed and returned to the FRC before the records will be destroyed. Prior to signing the NA Form 13001, the command will ensure that there are no actual or pending litigation freeze/holds on the records about to be destroyed.

(1) If there is an actual or pending litigation freeze or hold on the records, they cannot be destroyed. The command shall get concurrence with its legal department/counsel before destroying any records.

(2) If there is a question on the legal status of records Navy command shall contact CNO/DNS-5 and Marine Corps commands shall contact CMC (ARDB).

c. The organization/owner shall keep a copy of the NA Form 13001 and a copy of the SF-135 as an audit trail.

APPENDIX F

STANDARDS FOR NAVY RECORDS CENTER

1. Facility Standards for Records Center. Navy-owned records centers must comply with the facility standards specified below:

a. General.

(1) The facility should be a single story building, at or above ground level, constructed with noncombustible materials.

(2) A structural engineer shall establish a floor load limit for the records storage area. Post the allowable load limit in a conspicuous place and do not exceed it.

(3) Steel shelving or other open-shelf records storage equipment shall be braced to prevent collapse under full load in accordance with Federal Specifications AS-S-271 or AA-S-1047. The records storage height shall not exceed 15 feet. Navy records centers which have storage height in excess of 15 feet may apply in writing to the Assistant Archivist for Federal Records Center (NC), National Archives and Records Administration, Washington, DC 20408, for an exemption of this requirement. If a request for exemption is denied, agencies will be required to remodel existing centers to meet the 15-foot requirement.

(4) Equip the area occupied by the center with an anti-intrusion alarm system, or equivalent, to protect against unlawful entry after hours.

b. Fire Safety.

(1) All walls separating records areas from each other and from other storage areas in the building shall be 4-hour fire resistant. The records areas shall not exceed 40,000 square feet each. Two-hour-rated firewalls shall be provided between the records storage areas and other auxiliary spaces. Penetrations in the walls shall not reduce the specified fire-resistance ratings.

(2) Openings in firewalls separating records storage areas shall be avoided as far as possible but if openings are necessary they shall be protected by self-closing or automatic Class A fire doors, or equivalent, on each side of the wall openings.

(3) Roof support structures that cross or penetrate firewalls shall be cut and supported independently on each side of the firewall.

(4) If firewalls are erected with expansion joints, the joints shall be protected to their full height with No. 10 iron astragals lapping the opening of each side of the firewall.

(5) Building columns in the records storage areas

shall be 2-hour fire resistant from the floor to the point where they meet the ceiling or roof framing system.

(6) Automatic roof vents shall not be designed into new or existing buildings.

(7) Where lightweight steel roof or floor supporting members (e.g., bar joists have top chords with angles 2 by 1 1/2 inches or smaller, 1/4 inch thick or smaller, and 13/16 inch or smaller web) are present, they shall be protected either by applying a 10 minute fire-resistant coating to the top chords of the joists, or by retrofitting the sprinkler system with large drop sprinkler heads. Retrofitting may require modifications to the piping system to ensure that adequate water capacity and pressure are provided in the areas to be protected with these large drop sprinkler heads.

(8) Furnace or boiler rooms shall be separated from records storage areas by 4-hour-rated firewalls, with no openings directly from these rooms to the record storage areas. No open flame (oil or gas) equipment or unit heaters shall be installed or used in any records storage area.

(9) The arrangement of the records storage equipment shall be such that there shall be no dead-end aisles. Equipment rows running perpendicular to the wall shall terminate at least 18 inches from the wall.

(10) No oil-type electrical transformers, regardless of size, except thermally protected devices including fluorescent light ballasts, shall be installed in the records storage areas. All electrical wiring shall be in metal conduit, except that armored cable may be used where flexible connections to light fixtures are required.

(11) All records storage and adjoining areas shall be protected by automatic wet-pipe sprinklers. Automatic sprinklers are specified here because they provide the most effective fire protection for high-piled storage paper records on open-type shelving.

NOTE: Other automatic extinguishing systems or protective measures may provide an acceptable level of fire-loss risk depending upon specific conditions, such as type or importance of the records, the type and stacking height of the storage equipment used; or how the space is designed, controlled, and equipment used; or how the space is designed, controlled, and operated (as well as value). Agencies may elect to use alternate standards, as appropriate to their needs, such as those issued by the National Fire Protection Association (see NFPA 13, NFPA 231C, NFPA 232, and NFPA 232AM). Also agencies may consult the Chief of the Accident and Fire Prevention Branch in the GSA regional office about these or other systems and protective measures.

(12) The sprinkler system shall be rated at 286 degrees Fahrenheit and designed to provide 0.30 gpm per square foot for the most remote 1,500 square feet of floor

area with a minimum flowing pressure of 7.0 psi at the most remote sprinkler head. Installation shall follow Standard Number 13 of the National Fire Protection Association.

(13) Maximum spacing of the sprinkler head shall be on a 10-foot grid and positioning of the heads shall provide complete, unobstructed coverage, with a clearance of no less than 18 inches from the top of the highest stored material.

(14) The sprinkler system shall be equipped with a water-flow alarm connected to a continuously staffed fire department or central station, with responsibility for immediate response.

(15) A manual fire alarm system shall be provided with central station service or other automatic means of notifying the municipal fire department. A manual alarm pull station shall be located adjacent to each exit. Supplemental manual alarm stations are permitted within the records storage areas.

(16) All water cutoff valves in the sprinkler system shall be equipped with an automatic closure alarm connected to a continuously staffed station, with responsibility for immediate response.

(17) A dependable water supply free of interruption shall be provided. This normally requires a backup supply system having sufficient pressure and capacity to meet both fire hose and sprinkler requirements for two hours.

(18) Interior fire hose stations equipped with a 1 1/2 diameter hose shall be provided in the records storage areas, enabling any point in the records storage areas to be reached by a 50-foot hose stream from a 100-foot hose lay. The fire hoses shall not be provided, however, unless training in the handling and use of small hoses, protective gear, and breathing equipment has been given, and those protective items are available for brigade members.

(19) In addition to the designed sprinkler flow demand, 500 gpm shall be provided for hose stream demand. The hose stream demand shall be calculated into the system at the base of the main sprinkler riser.

(20) Fire hydrants should be located within 250 feet of each exterior entrance or other access to the records center that could be used by firefighters. All hydrants should be at least 50 feet away from the building walls and adjacent to a roadway usable by fire apparatus.

(21) Portable water-type fire extinguishers (2 1/2 gallon stored pressure-type) shall be provided at each fire alarm striking station.

(22) Catwalks may be provided in the aisles between the metal stacks in high-activity records storage areas without provision of sprinklers under the walkway.

Where provided, the walking surface of the catwalks shall be of expanded metal at least 0.09-inch thickness with a 2-inch mesh length. The surface opening ratio shall be equal to or greater than that outlined in Military Specification (MIL-M-17194C) of March 9, 1955. The sprinkler water demand for protection over bays with catwalks where records are not oriented perpendicular to the aisles shall be calculated hydraulically to give 0.3 gpm per square foot for the most remote 2,000 square feet.

(23) Storage of hazardous cellulose nitrate film requires special facilities not covered by the above standards. (See NFPA 40 and NPA 232).

2. Requests for Authority to Establish or Relocate Records Centers. No Navy Records Center shall be established or relocated from one city to another without the prior written approval of NARA.

a. Exclusions.

(1) Staging areas containing less than 5,000 square feet of space used for the temporary storage of materials preparatory of their transfer to a records center or other disposition, provided no records are held in staging areas in excess of 5 years.

(2) Areas of less than 5,000 square feet used solely for the storage of records to which occasional reference is made but on which no processing activity (screening and microfilming, etc.) is performed.

b. Content of Requests. Requests for authority to establish or relocate a Navy Records Center shall be submitted in writing to the Assistant Archivist for Federal Records Centers (NC), National Archives and Records Administration, Washington, DC 20408, via the Navy Directives and Records Management Branch (N09B35), Office of the Chief of Naval Operations. These requests shall specify:

- (1) proposed location of the records center,
- (2) space to be occupied in gross square feet,
- (3) nature and quantity of records to be stored,
- (4) total personnel to be employed, and

(5) justification for the proposed center which shall include a comparison between the annual cost per cubic foot to store the records in a Navy Records Centers and the cost to store the same records in a Federal Records Center. Analysis of Federal Records Center space and equipment costs may be obtained from the Office of Federal Records Centers (NC), National Archives and Records Administration, Washington, DC 20408. The justification should also indicate whether the records to be stored in the Navy center have high security classification, require specialized processing or high-cost indexing, or are to be used by technical personnel stationed at the records

center.

c. Approval of Requests. Request for the establishment or relocation of Navy Records Centers should be submitted to Directory of Records (DNS-5) Office of the Chief of Naval Operations, via the appropriate chain of command. Requests will be approved by NARA when greater economy or efficiency can be achieved through its operation than by the use of a NARA operated Federal Records Center.

APPENDIX H

DON Vital Records Program

1. **Introduction.** This Appendix sets forth the objectives and program guidelines of the DON Vital Records Program. The DON must be able to accomplish mission essential functions (MEFs) without unacceptable interruption during a national security emergency, or other emergency or disaster; and also protect the legal and financial rights of the DON and of individuals directly affected by its activities. The DON Vital Records Program is the means by which records needed to support the above are identified, stored, and protected. Management of vital records is an integral part of the Department's Continuity of Operations Program (COOP).

2. **Definitions.** The definitions in this section are taken from 36 C.F.R. 1236.14.

a. **Cycle** means the periodic removal of obsolete copies of vital records and their replacement with copies of current vital records. This may occur daily, weekly, quarterly, annually or at other designated intervals.

b. **Disaster** means an unexpected occurrence inflicting widespread destruction and distress and having long-term adverse effects on agency operations. Each agency defines what a long-term adverse effect is in relation to its most critical program activities.

c. **Emergency** means a situation or an occurrence of a serious nature, developing suddenly and unexpectedly, and demanding immediate action. This is generally of short duration, for example, an interruption of normal agency operations for a week or less. It may involve electrical failure or minor flooding caused by broken pipes.

d. **Emergency operating records** are that type of vital records essential to the continued functioning or reconstitution of an organization during and after an emergency. Included are emergency plans and directive(s), orders of succession, delegations of authority, staffing assignments, selected program records needed to continue the most critical agency operations, as well as related policy or procedural records that assist agency staff in conducting operations under emergency conditions and for resuming normal operations after an emergency.

e. **Legal and financial rights records** are that type of vital records essential to protect the legal and financial rights of the Government and of the individuals directly affected by its activities. Examples include accounts receivable records, social security records, payroll records, retirement records, and insurance records. These records were formerly defined as "rights-and-interests" records.

f. **National security emergency** means any occurrence, including natural disaster, military attack, technological emergency, or other emergency, that seriously degrades or threatens the national security of the United States, as

defined in Executive Order 12656.

g. **Off-site storage** means a facility other than an agency's normal place of business where vital records are stored for protection. This is to ensure that the vital records are not subject to damage or destruction from an emergency or disaster affecting an agency's normal place of business.

h. **Vital records** mean essential agency records that are needed to meet operational responsibilities under national security emergencies or other emergency or disaster conditions (emergency operating records) or to protect the legal and financial rights of the Government and those affected by Government activities (legal and financial rights records).

i. **Vital records program** means the policies, plans, and procedures developed and implemented and the resources needed to identify, use, and protect the essential records needed to meet operational responsibilities under national security emergencies or other emergency or disaster conditions or to protect the Government's rights or those of its citizens. This is a program element of an agency's emergency management function.

3. **Program Objectives.** The objectives of the DON Vital Records Program are to:

a. Create and maintain current duplicative records at DON relocation sites adequate to support DON emergency actions and MEFs in National security emergencies, in accordance with 36 C.F.R. Part 1236 and DoD Directive 3020.26.

b. Safeguard records essential to the reconstitution of DON organizations and the re-establishment of DON operations once the situation has stabilized.

c. Provide for the preservation of legal and financial rights records of the DON and individuals directly affected by its activities.

d. Standardize vital records selection, labeling, and storage procedures.

e. Ensure all equipment needed to read vital records or copies of vital records will be available in case of emergency or disaster; and for electronic information systems, that system documentation adequate to operate the system and access the records will be available.

f. Encourage the use of information technology solutions to ease the accounting, inventory review, and retrieval of vital records or copies of vital records.

4. **Responsibilities.**

a. The Chief of Naval Operations (CNO) and the Commandant of the Marine Corps (CMC) are responsible for establishing and maintaining a robust Vital Records

Program in the Navy and Marine Corps respectively, as an integral part of the Continuity of Operations Program (COOP). The Assistant for Administration to the Under Secretary of the Navy (AAUSN) is responsible for ensuring that provisions for the identification and protection of vital records are included in COOP plans and guidance for all organizations within the Office of the Secretary.

b. DON activities need to identify, inventory, protect, store, make accessible, and cycle (update as needed) the copies of vital records required in an emergency, including records that document legal and financial rights. Records Management personnel play a crucial role in providing guidance and assistance in inventorying records and determining appropriate maintenance practices for copies of vital records. Based on contingency planning analysis and identification of both emergency-operating records and those needed to protect legal and financial rights, program managers must determine which records within their physical or legal custody are vital.

c. Program Managers, in consultation with Records Management personnel, should then take steps to ensure that copies of those vital records are properly managed throughout their life, as they are updated, stored, and cycled. In addition, original vital records must be properly maintained until their authorized disposition in accordance with approved disposition schedules contained in Chapters 1 through 13 of this Manual.

5. Vital Records Plan.

a. DON activities should develop a vital records plan. The first part of the plan is a description of records that are vital to continued operations or for the protection of legal and financial rights. The plan also includes specific measures for storing and periodically cycling (updating) copies of those records. The Vital Records Plan should also address recovery of records (regardless of medium) that are damaged in an emergency or disaster.

b. The description of vital records is based on identification and inventorying. The following steps are involved in identifying vital records and records disaster mitigation, and should be performed in conjunction with COOP planning efforts:

(1) Review normal command/organization functions. Identify the categories of records relating to each of these functions. Review existing COOP plans and determine which functions are necessary during a national security emergency. After those functions are identified, earmark specific vital records for safeguarding.

(2) Review emergency functions assigned to command/organization and treat in same manner as outlined in 3.a. above.

(3) Review documentation created for contingency planning and risk assessment phase of emergency preparedness (COOP documents). Such documentation

will produce vital records material requiring proper safeguards.

(4) Review current file plans of offices that are responsible for performing mission essential functions.

(5) Review the records manual or records schedule to determine which records series potentially qualify as vital.

(6) Identify which records series or electronic information systems contain information needed to protect the legal and financial rights of the DON and persons directly affected by the organizations.

c. Caution must be exercised in designating records as vital and in conducting the vital records inventory. A review by the National Archives and Records Administration found that from 1 to 7 percent of Federal agency's records might be vital records. Only those records series or electronic information systems (or portions of them) most critical to emergency operations or the preservation of legal or financial rights should be so designated.

d. Records likely to be selected as vital include:

(1) Emergency-Operating records.

(a) Statements of mission in an emergency, and plans and programs for carrying out that mission

(b) Delegations of authority

(c) Orders of succession

(d) Organization and manning documents

(e) Pre-drafted directives or announcements to be issued immediately at the beginning of an emergency

(f) Emergency action programs that may have been drafted in skeleton form

(g) Vital records inventories

(h) Information about DON personnel, property, and activities sufficient to provide basis for damage assessments

(i) System documentation for any electronic information systems designated as emergency operating records

(j) Copies of basic regulations and procedures

(k) Lists of personnel assigned emergency duties, as well as lists of employees' skills that might be useful during and following an emergency.

(l) Industrial records such as engineering

drawings, explanation of complex industrial processes, list of suppliers for items and materials not readily available, and similar items

Note: This list is not inclusive.

(2) Legal and Financial Rights Records.

(a) If DON is the statutory office of record for legal rights, it has primary responsibility for records protection.

(b) Fiscal records such as periodic summary of financial status of organization; records of significant amounts of money owed to DON, and records of debt owed by DON

Note: This list is not inclusive.

e. The inventory of vital records should include:

(1) The name of the office responsible for the records series or electronic information system containing vital information.

(2) The title of each records series or information system containing vital information.

(3) Identification of each series or system that contains emergency-operating vital records or vital records relating to rights.

(4) The medium on which the records are recorded.

(5) The physical location for offsite storage of copies of the records series or system.

(6) Classified documents should be labeled correctly. The command security manager must approve special space or equipment before storage of classified records begins.

f. Protection and Storage of Vital Records.

(1) After completion of the inventory, protection methods and storage sites must be chosen for vital records. The former may include using existing duplicates of the records designated as vital or duplicated for this purpose. If performing duplication, it is generally most economical to duplicate the original medium onto the same medium; that is, duplicate microfiche onto microfiche or magnetic tape onto magnetic tape.

(2) Appropriate equipment should be selected to ensure the continued preservation of copies of the vital records until they are cycled. In addition, organizations should ensure proper environmental conditions for storage of copies of vital records, particularly for those recorded on fragile media such as microfilm or magnetic tape or disks, until they are replaced.

(3) Given the importance of vital records, if possible, organizations should arrange for offsite storage of copies in a facility not subject to the same emergency or disaster but still reasonably accessible to personnel. Current duplicative records necessary to support DON MEFs in National security emergencies shall be stored at DON relocation sites. Periodic cycling (updating) of copies of vital records is essential.

6. Training

a. Personnel assigned responsibilities in the Vital Records Program should receive appropriate training. Periodic briefings should be given to senior managers, especially those new to the organization, about the vital records program and its relationship to their records.

b. Appropriate personnel such as records managers or administrative officers should ensure that all personnel within the organization receive training appropriate to their assigned duties. Such training generally focuses on the identification, inventorying, protection, storage, and cycling of copies of the activities vital records. Wherever possible it should be integrated with existing training initiatives, particularly in such areas as records management and continuity of operations (COOP) planning and operations.

7. Reviews and Testing

a. The vital records program should be reviewed at least annually to determine whether vital records are adequately protected, current, and accessible to personnel who would use them.

b. In addition, valuable information for improving the program can be obtained by testing it under simulated emergency or disaster conditions.
