

**REPORT TO CONGRESS ON
DEPARTMENT OF DEFENSE
FISCAL YEAR 2015 PURCHASES FROM
FOREIGN ENTITIES**

Office of the Under Secretary of Defense for
Acquisition, Technology, and Logistics

June 2016

The estimated cost of report or study for the Department of Defense is approximately \$5,000 for the 2015 Fiscal Year. This includes \$0 in expenses and \$5,000 in DoD labor.
Cost estimate generated on May, 18 2016. RefID: 3-3277A4F

Background

Pursuant to both section 8305 of title 41, U.S.C., and section 8028 of the Consolidated and Further Continuing Appropriations Act, 2015 (Public Law 113-235), this is the required report for Department of Defense (DoD) purchases from foreign entities in fiscal year (FY) 2015. Both sections require the Secretary of Defense to submit a report to Congress on the total dollar value of DoD purchases from foreign entities during FY 2015. The Secretary is also required to identify the dollar value of items for which the Buy American Act (BAA) was waived pursuant to any reciprocal defense procurement memorandum of understanding (MOU), between the United States and a foreign country pursuant to which the Secretary of Defense has prospectively waived the Buy American Act for certain products in that country, the Trade Agreement Act (TAA) of 1979 (19 U.S.C. 2501 et seq.), or any international agreement to which the United States is a party.

Discussion

The information contained in this report is based on FY 2015 contract data from the Federal Procurement Data System – Next Generation (FPDS-NG) and data compiled and distributed by the DoD Defense Manpower Data Center, Statistical Analysis Information Division. The FPDS-NG data addresses contracting procedures, competition, financing, statutory requirements, socioeconomic programs, and other information relating to DoD contracting activity with prime contractors. The data was then certified by the Military Departments and Defense Agencies.

All procurements from foreign entities

DoD procurement actions recorded and certified in FPDS-NG during FY 2015 totaled approximately \$273 billion. Of that amount, approximately \$11.3 billion, or 4.1 percent, of total DoD obligations were expended on purchases from foreign entities. Table 1 highlights the twelve (12) countries with the highest amount of contract obligation. These countries accounted for approximately 84 percent of the total DoD foreign obligations during FY 2015. A detailed breakout of obligated dollars by country in the alphabetic order is contained in Table 2.

TABLE 1: Top twelve countries with the highest contract obligations during FY 2015

The \$11.3 billion of obligations cover military hardware, subsistence, fuel, construction, services, and other miscellaneous items. Chart 1 provides a breakout of procurement categories from the foreign entities. Fuel, services, construction, and subsistence account for approximately 79 percent of the total purchases from foreign entities. Defense equipment constitutes approximately 13 percent of the purchases from foreign entities. The remaining 8 percent of the purchases cover a variety of categories.

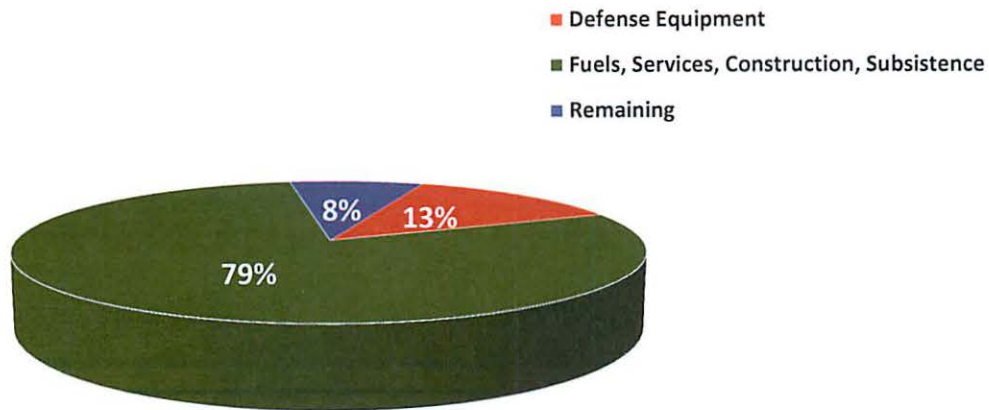

CHART 1: Percentage of Procurement Category from the Foreign Entities

Table 3 provides a breakout of the \$11.3 billion by purchase category and the percentage of the total obligation.

Dollar value of manufactured articles for which the restrictions of the BAA were not applied pursuant to MOUs, the TAA, or other international agreements

The restrictions of the BAA were not applied to 43,459 DoD purchases totaling approximately \$5.4 billion due to waivers, authorized exceptions, and inapplicability. The breakout of these purchases is as follows:

- About 81 percent of purchases, or 30,432 actions totaling approximately \$4.3 billion, represent those contract actions for which the restrictions of the BAA *are not applicable* because they are for items manufactured and used outside the United States.
- The total authorized *wavers* pursuant to MOUs, the TAA, or other international agreements represented 9,686 purchases totaling approximately \$653.4 million.

- The total authorized *exceptions* to the BAA represented 3,341 purchases for approximately \$373 million. These exceptions provided in the law include: (1) manufactured outside the United States – Resale; (2) manufactured outside the United States – Commercial Information Technology; (3) manufactured outside the United States – Public Interest Determinations; (4) manufactured outside the United States – Determination made based on Domestic Non-Availability; and (5) manufactured outside the United States – Unreasonable Cost of Domestic End Product.

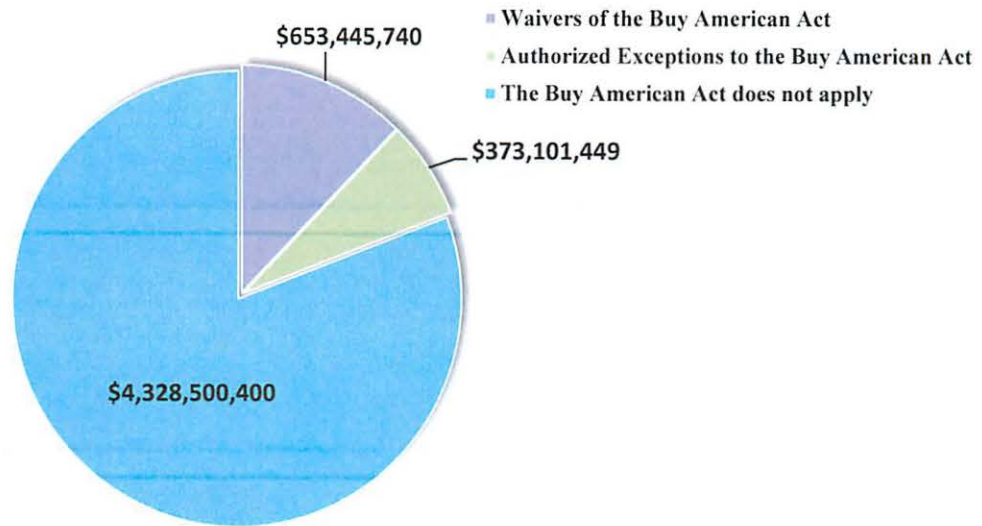

CHART 2: Obligations for which the restrictions of the Buy America Act were not applied in FY 2015

Table 4 provides a detailed breakout of the actions and dollars by category and an explanation of the authority for each of the categories.
